

## **ZM Series Conical Refiner**

## Application&Feature

- 1. Primarily apply for continuously pulping wood pulp, mechanical pulp, cotton pulp, waste paper pulp etc. Improving the beating degree, which can be used with double disc refiner in series.
- 2. With features of long refining area, fully process finer, strong ability to cut fiber.
- 3. Shell's lined is stainless steel for improving service life.
- 4. Adopt constant power control system, the beating effect is stable.
- 5. Rotor and stator have various tooth. Suitable various raw materials.

## **Main Specification**

Rotor Size(mm)	Φ450	Ф460
Operation Concentration (%)	3-5	3-5
Product Capacity(t/d)	20-60	30-150
Motor Power(kw)	110	132-315
